

# CuCrZr

## Aluminum-based alloy

CuCrZr is a precipitation hardened alloy with additions of chrome and zirconium. The alloy has very high electrical and thermal conductivity at good strength levels. The properties make the alloy suited for complicated technical application where a high conductivity is demanded, and the component is exposed to stresses and temperatures.

## Advantage

- > High electrical conductivity
- > High thermal conductivity
- > Good strength
- > Excellent hot formability

## Ideal Applications

- > E-mobility
- > Automotive
- > Connectors
- > Electrical engineering

## Technical Datasheet

Cu (%)	Cr (%)	Zr (%)
rem	0.2-1.2	0.05-0.25

Melting point (°C)	Density (g/cm³)	cp @ 20°C (kJ/kgK)	Young's modulus (GPa)	Thermal cond. (W/mK)	Electrical cond. (MS/m)	(%IACS)	α @20-300°C (10⁻⁶/K)
