

FGF-800PRO

Kings Industrial FGF 3D Printers

Large Format, High Speed, Low Material Cost

◆ Overview

Kings FGF-800Pro is a large-format granular 3D printer with advantages of fast printing speed and large printing size. It uses granular and polymer composite materials for printing, which features great mechanical properties and strong durability, excellent cost-effectiveness and environmental friendliness.

It is widely used for sculpture, theme park, movie prop, art craft, window display, public attraction, furniture, advertising, signage, mining, oil & gas and molding industries.

◆ Advantage

- Using pneumatic automatic feeding system
- Supporting emergency stop for safety assurance
- No assembly is required after receiving the machine
- Demonstrating the printing progress with the status indicator light
- Automatic leveling system with non-contact laser ranging (0.01mm accuracy)
- Achieving automatically resume feeding or pause printing when detecting material shortage
- Fully enclosed sheet-metal housing for heat preservation and also supporting high temperature insulation
- Utilizing a belt design on the Z-axis, but precision modules on the X and Y axes to enhance the stability of the printing

◆ Ideal Applications

- It is widely used for sculpture, theme park, movie prop, art craft, window display, public attraction, furniture, advertising, signage, mining, oil & gas and molding industries.
